Professional Summary

Aspiring full-stack software developer with practical experience delivering dynamic web applications using Python, Django, React, and PostgreSQL. Foundational experience designing responsive, user-friendly interfaces and implementing secure authentication, APIs, and databases. Demonstrated ability to plan and deliver projects using Agile methodology, with a track record of freelance client work. Strong communicator and adaptable team player with proven problem-solving skills. Eager to contribute technical expertise in a junior developer role while continuing to grow professionally.

Technical Skills:

Languages: Python, JavaScript, SQL, HTML5, CSS3 | Frameworks & Libraries: Django, Django REST Framework, React.js, Bootstrap | Databases: PostgreSQL, SQLite | Tools & Platforms: Git, GitHub, Heroku, Cloudinary | Other: Agile Methodology, Responsive Design, Authentication

---

Portfolio Projects

Event Hub | React.js, Django REST Framework, PostgreSQL
(Associated links can be found in portfolio website)
 A dynamic platform for music lovers to discover and interact with events. Planned and delivered features iteratively using Agile methodology and user stories. Built secure authentication with session persistence, user roles, and role-based permissions. Developed event management features including creation forms, image uploads, infinite scroll, and search/filter. Implemented full CRUD comment functionality for community interaction. Created a custom Django REST Framework API and responsive React frontend.

Recipe Blog | Django, PostgreSQL, Bootstrap, Cloudinary
(Associated links can be found in portfolio website)
 A recipe-sharing platform with recipe management, reviews, and community features. Implemented authentication and email verification with Django Allauth. Built CRUD functionality for recipes with ingredient lists, instructions, and Cloudinary image uploads.

Added rating and review system to drive engagement and highlight popular content. Developed profile pages displaying user contributions and added search/filter functionality. Deployed with Heroku, ensuring performance and responsiveness across devices.

Education

Code Institute – Diploma in Full-Stack Software Development (Completed February 2025): Comprehensive training in full-stack web application development, covering both front-end and back-end technologies. Core modules: HTML, CSS, JavaScript, Python, React, Django, SQL, Data Structures & Algorithms, Advanced Front-End Development. Gained hands-on experience delivering multiple projects using Agile methodology, version control (Git/GitHub), and cloud deployment.

Experience

Freelance Web Developer – May of 2025 onwards
 Built and delivered professional websites using HTML5, CSS3, JavaScript, React, Python, Django, and SQL. Implemented dynamic contact forms with EmailJS to automatically send enquiries to clients. Improved performance with responsive design, SEO optimization, and cross-browser compatibility. Supported hosting and deployment.

Hospitality Roles (Kitchen Porter → Fryer/Cook) – Various Establishments - 20/04/2024 - 28/7/2025
 Worked in fast-paced kitchens, consistently meeting tight deadlines during peak service. Developed strong teamwork and communication skills while supporting chefs and staff. Progressed from porter duties to fryer/Cook operations, demonstrating adaptability and growth.

Labourer (Scotland) – 01/06/2024 to 01/08/2024
 Assisted with insulation, roofing, window and door fitting, and brickwork. Learned practical skills quickly and adapted to varied working conditions. Built resilience, reliability, and problem-solving while supporting skilled tradespeople.
